Linux Professional Institute

The LPI Linux Essentials Exam 010-160

This LPI certification exam is ~40 multiple choice/fill-in questions to be completed within 60 minutes. Passing score is **500** (*bottom score is 200, top score is 800*).] It is a lifetime certificate. It is owned by Linux Professional Institute. The website and the objectives are available to better understand what will be on the certification exam.

```
130 HOSTS=( echo $HOSTDATA | wc -w | sed 's/ / /' )
131 NUMS=( echo $HOSTDATA | cut -d' ' -f ${SPLIT} 2>/dev/null )
132 [ "$HOSTS" -a "$NUMS" ] || _die "Cannot determine hostlist for archives"
133 [ "$CHK_COMP" ] || _die "Invalid or missing input for compression type"
134 CNT=0
135 for HOST in ${HOSTS[@]}; do
136     egrep -q "^$HOST[" "$BUPC_HOSTS" || ERROR="$ERROR $HOST"
137     FILES="$FILES ${HOST}.${NUMS[$CNT]}.tar${COMP}"
138     CNT=$(( CNT + 1 ))
139 done
140 echo $COMP | grep -q '.bz2$' && COMP_OPT=j
141 echo $COMP | grep -q '.gz$' && COMP_OPT=z
142 _die "Archive hosts do not exist - $ERROR"
    _die "create archive file list"
```

There are MANY TOOLS TO ASSIST YOU IN STUDYING, PREPARING AND PASSING THE LINUX EXAM. Here are JUST a FEW THINGS TO GUIDE YOU...

Resource Ideas & Links For LINUX

Canvas has videos and hands-on labs to simulate real world experiences. It also contains the final exam and homework. You can access all your previous Canvas courses (*and everything included within them*) until the end of your MTF (*maximum time frame*).

This [Google](#) drive contains many study materials and resources including ISOs for multiple Linux distributions and Windows servers. It has specifically been cultivated by CJ. It will exist as long as my tenure, assumably. It is ever evolving and updating.

[YouTube](#) is a very popular option to listen to/see many different perspectives of Linux material. One YouTuber many people enjoy: [Shawn Powers](#). He has a lot of great ways to explain LPI Linux Essentials concepts to help you prepare for the certification.

Free Courses & Resources! I don't believe you should ever need to pay anything extra to study and do more research; you have a right to gain comprehension. There are many paid sites, but here are some free courses and tutorials to further your education.

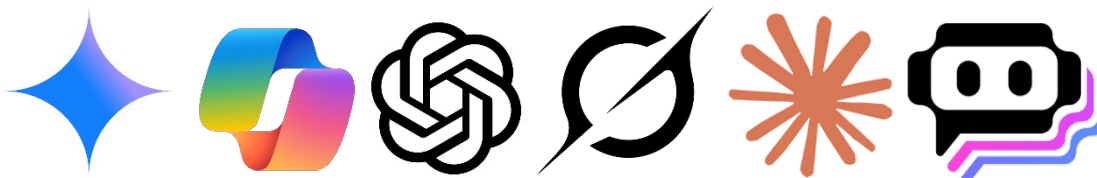

Free Practice Tests!

Try these quizzes to practice for the *actual* certification exam!

Artificial Intelligence! AI will allow you to study and ask questions to further your understanding. You can also create practice tests; ask for a 10, 20, or 50 question practice quiz to review for the certification exam. *A great way to practice testing is to take more tests.*
